International Baccalaureate Diploma Programme

The IB Diploma Programme is a rigorous and broad programme of study for students from 16 to 18 years of age. It is respected by leading Universities throughout the world and is a benchmark for excellence in education.

The Diploma Programme curriculum allows students to thrive holistically and develop excellent breadth and depth of knowledge.

Through the Diploma Programme they acquire skills to reflect on themselves as learners and as global citizens, becoming aware of the world and their place in it. The Diploma programme requires academic competence, commitment and resilience from students whilst encouraging caring action in the community, the pursuit of extra curricular activities and contemplation on the nature of knowledge itself.

At BCG we strive to help our students develop the skills necessary to succeed in this challenging course, becoming reflective, principled, independent learners and globally-minded citizens. Students have the choice of a wide range of subjects at BCG, including the arts and our student-centred philosophy means our provision is assessed regularly to ensure we meet the needs of each cohort.

Our ESD project (Education for Sustainable Development) forms an integral part of our CAS programme, further consolidating our school mission to foster attitudes we believe are fundamental to shaping sustainable futures.

IBCP with Pathways in Sustainability

Pre-university programmes for students from 16 to 18.

Get ready for an exciting career in the growing green sector while you continue to deepen academic knowledge, develop sound interpersonal skills and grow into a principled, responsible global leader.

Global sustainability is a truly universal endeavor. Our IBCP with Pathways in Sustainability* enable students to embrace an international perspective and connect them with a network of other IBCP students across the world.

There has never been a better time to start preparing for a career in sustainability, this is why BCG has launched the following pre-university programmes:

- Sustainable Fashion
- Finance & Digitalisation
- Tourism
- Hospitality
- Nature conservation

*In partnership with Sustainability Management School (SUMAS)

Upon completion of the IB Career-related Programme at BCG in collaboration with SUMAS students will obtain direct entry to SUMAS Bachelors programmes and receive 21 US academic credits to fast-track bachelor studies in only 5 semesters.

For students with a strong interest in becoming environmental changemakers and those that may benefit from an alternative, more flexible way of learning

IBCP with a Pathway in Business

Pre-university programmes for students from 16 to 18.

The IBCP with a Pathway in Business at BCG is the perfect opportunity for those students who are considering Business as their top career choice while continuing with the discipline, rigour and international mindedness of the IB.

Students will acquire the knowledge and skills they need to embark on a business-related career while developing lifelong skills in applied knowledge, critical thinking, communication, and cross-cultural engagement. Students take three IB subject courses, complete the IBCP core and study seven modules with the EU Business School, both online and at their campus in Barcelona.

This pathway will allow students to explore, understand and engage in real world business applications that will be of great use to them in the future as professionals but it will also provide them with the academic knowledge needed for their bachelor's degree.

*In partnership with EU Business School

Upon successful completion, students are automatically admitted into the first year of EU Business School Bachelor's Programmes at any of their campuses in Barcelona, Munich or Geneva.

For students that want to participate in practical work placements at local companies to give an insight into a 'real-life' working environment and independent learners with a more practical mindset interested in a more hands-on approach.
